PROJECTS

Project Title Cross Site Scripting (XSS) Detection and Prevention in Web Applications 01/2025 – 04/2025

Project Description

The project “Cross Site Scripting (XSS) Detection and Prevention in Web Applications” is developed to identify and prevent XSS vulnerabilities in websites. Cross Site Scripting is a common web security attack where malicious scripts are injected into web pages, affecting user data and website security.

This project focuses on detecting harmful input scripts, validating user inputs, and preventing unauthorized script execution using secure coding techniques. The system improves web application security by protecting user information and reducing security risks. The project was developed using basic web technologies and cyber security concepts to understand real-time web vulnerabilities and their prevention methods.
